Multiple URT Drills

Caution! Failure to read and understand the Urban Rifle Target Use and Care instructions prior to use in these drills greatly increases the risk of injury to persons and property. You should read and fully understand the instructions for use before any attempting any of these drills!

Basic Safety Instructions

- Always wear eye and ear protection.
- Brimmed hat and long sleeves recommended.
- Never shoot shotgun slugs, hardened, or armor piercing ammo at any steel target.
- Minimum distance from **Urban Rifle Target**: 75 yards
Spectators: 10 yards directly **behind** shooter.
- Use only on a properly constructed range with a minimum height backstop of 25 feet.
Targets are intended for specific use as part of an inherently dangerous activity.
Use in the intended manner only in compliance with enclosed instructions. even so, injury may occur due to the inherently dangerous nature of the activity.

DTI Qualifier

Equipment required: All 5 URTs positioned at 50 yards with 2 yards between each URT. Fully loaded Rifle/Carbine of which only five (5) rounds of ammunition will be fired.

Starting position: Rifle/Carbine slung on shoulder, facing downrange and moving laterally. Before first audible signal, shooter must look fully & completely to the rear. (360 degrees), at least once.

First audible signal: Move laterally off of line of force while un-slipping Rifle/Carbine (keeping finger off of trigger). Verbal commands, for shooter are optional.

Advanced Options:

- Have the URTs each at different distances.
- Alternate your shooting shoulder, from your main shoulder to your support shoulder, while moving to next shooting position.

Cover to Cover Drill

Equipment required: 5 URTs positioned at 75 yards with 3 to 4 yards between each URT. Fully loaded Rifle or Carbine. Shooting position is determined by type of cover at each position. Example: right or left side of a barricade, under a table or chair, over a low barricade, using a vehicle for cover (around, over and under), etc. Your imagination is your only limitation.

Starting position: Rifle or Carbine slung on shoulder, facing downrange and moving laterally.

Upon hearing audible signal:

1. Move laterally off of line of force while un-slipping Rifle or Carbine (keeping finger off of trigger) to the first "shooting position" and engage the first target with two (2) consecutive hits.
2. After two successful consecutive hits on the first plate, move laterally with the trigger finger off of the trigger, to the next shooting position and engage that target with two (2) consecutive hits.
3. Repeat the above step #2 until all targets are successfully hit.

Scoring: Keep track of your times versus the number of rounds fired. If the number of rounds fired is greater than four (4) per position, slowdown and get your hits. Slow hits are better than fast misses. Work towards 100% accuracy with minimum time required.

Advanced Options:

Have the **Second audible signal:** Move laterally (4 to 6 feet minimum), stop & engage first URT.

After first URT is engaged the shooter must move laterally or vertical-down two (2) additional times before engaging the fifth or last URT. Vertical-down movement is standing to kneeling, standing to prone, or kneeling to prone.

Scoring:

- 100% accuracy required. Each plate must be hit once and only once.
- 22 seconds is "par time".
- No "safety errors"! example: finger on trigger too soon, finger on trigger while moving, etc.
- No "procedural errors"! example: not looking behind you (36- degrees), not enough number of movements, etc.

Run-N-Gun

Equipment required: 5 URTs positioned at 75 yards with 3 to 4 yards between each URT. Fully loaded Rifle or Carbine. Shooting position is off hand, no sling used.

Starting position: Rifle or Carbine slung on shoulder, facing downrange and moving laterally.

Upon hearing audible signal:

1. Move laterally off of line of force while un-slipping Rifle or Carbine (keeping finger off of trigger) to the first "shooting position" and engage the first target with two (2) consecutive hits.
2. After two successful consecutive hits on the first plate, move laterally with the trigger finger off of the trigger, to the next shooting position and engage that target with two (2) consecutive hits
3. Repeat the above step #2 until all targets are successfully hit. Repeat hit.

Scoring: Keep track of your times versus the number of rounds fired. If the number of rounds fired is greater than four (4) per position, slowdown and get your hits. Slow hits are better.

Advanced Options:

- URTs each at different distances.
- Alternate your shooting shoulder, from main shoulder to support shoulder as you move to the next shooting position.
